Building Notes

- Front Deck
  - **Beware of the water line in the deck**
  - The biggest challenge is working with the under frame, there is plenty of extra lumber
  - Step vs stairs
    - Lumber is provided for both, if the distance between stairs and the surface of the concrete is less than 15 inches
    - If you cut stringers, you will need 3
  - Ask the client if the want handrails all around!
- Back Deck
  - Simple demo and rebuild
